The Rockhampton Alternative Learning Space is a flexible learning environment for disengaged students looking to improve their literacy and numeracy skills.

The space offers two programs to cater for the different needs of the students within the Rockhampton area: Short courses in both literacy and numeracy and BKSB.

Both programs provide support for students with individualised programs tailored to their individual learning needs and one on one support from an educator at Capricornia School of Distance Education and an on site supervisor from our partners at PCYC.

For more information please contact Capricornia School of Distance Education.

For more information on either of the programs, please contact Capricornia School of Distance Education.
The literacy and numeracy short courses have been developed by the fully qualified educators at Capricornia School of Distance Education and are delivered to the youth of Rockhampton. They offer unique opportunities to young people who may have disengaged from school for a variety of reasons. The short courses are:

- For 15-18 yr old disengaged students
- An online course including all resources
- Provided with support from educators at CSDE and supervisor on site
- Designed to improve skills for increased employment opportunities and potential further study
- Allowing youth to gain year 12 equivalency in literacy and numeracy
- Designed to cater for different learning needs and styles
- Provided in a flexible learning environment
- A way for young people to achieve their goals

The BKSB program is a fully online program that began in England but has since been modified for Australia and has proved to be highly successful, not just for schools but for many institutions. 1.2 million users access the literacy and numeracy component world wide.

Disengaged students 13-18 are able to enrol with Capricornia School of Distance Education to join that 1.2 million and access this world class program.

The program supports students in improving their literacy and numeracy while still being monitored by the educator at the CSDE facility. Through being an online program, BKSB provides students with the flexibility to match all learning styles and needs.

Students who participate within the BKSB program have unlimited support as well as the opportunity to continue on with the literacy and numeracy short courses or remain within the program up until a tertiary standard.

Students who enrol with Capricornia School of Distance Education for either BKSB or the short courses are open to pathways of continuing their academic careers.

The short courses allow students to continue on with further education at TAFE or to seek employment that require them to have a year 12 equivalency directly without seeking their QCE.

Students who have participated within the BKSB program may be eligible to move into the short course program if this is a direction they wish to take.

Entry into either of these programs is currently through referral process and interview.

For more information on the programs or for a referral please contact the school directly.
