

# How to Save Work into the **Correct Class**.

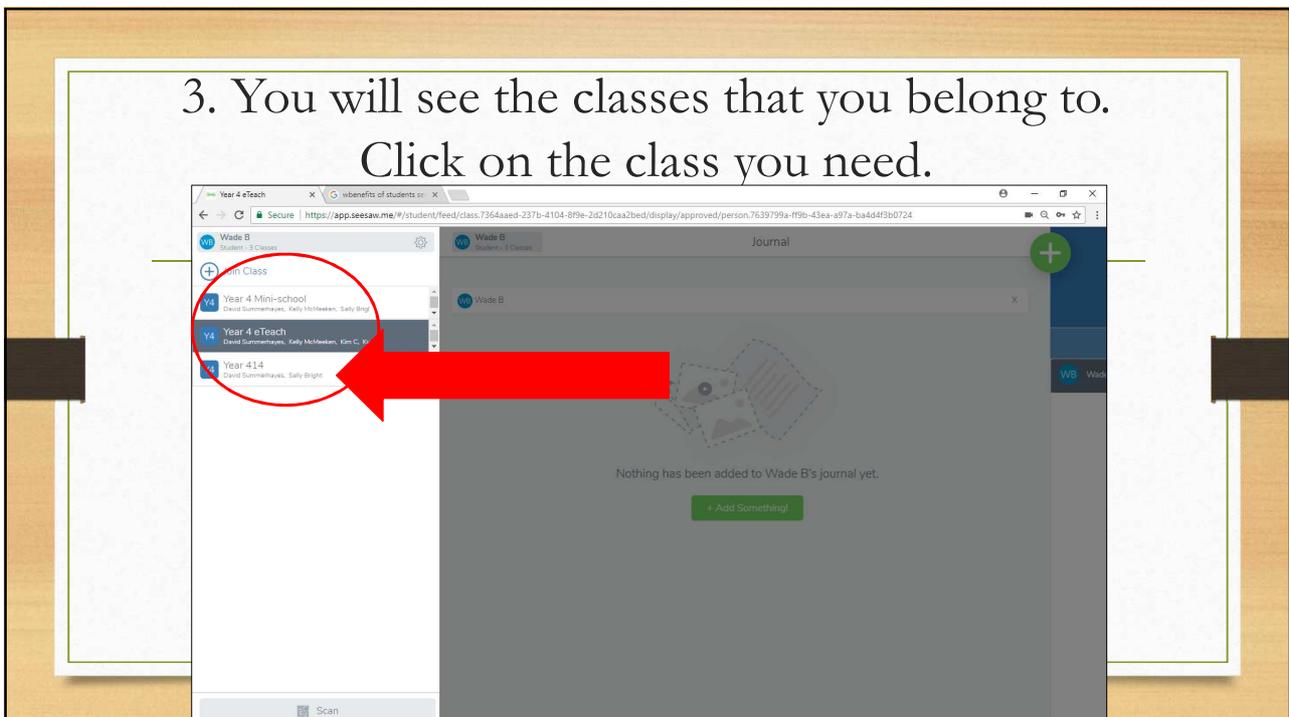

## 1. Check that you have the correct class open.

A screenshot of the Seesaw web application interface. The browser address bar shows the URL: https://app.seesaw.me/#/student/need/class.c5aad1b2-774a-4140-8410-a06d85d50712/person.7639799a-ff9b-43ea-a97a-ba44f3b0724. The page title is "Journal" and the user is identified as "Wade B". The main content area displays a message: "Nothing has been added to Wade B's journal yet." with a green "+ Add Something!" button. On the right side, there is a sidebar with a class list. The class name "Year 4 Mini-school Student" is circled in red, and a red arrow points from the top right corner of the page towards this class name. Below the class name, a list of students is visible, including Wade B, Adelaide M, Adrian W, Amber W, Darcy-Jayne S, David E, Ethan K, Harry J, Jacklyn E, and Margana W.

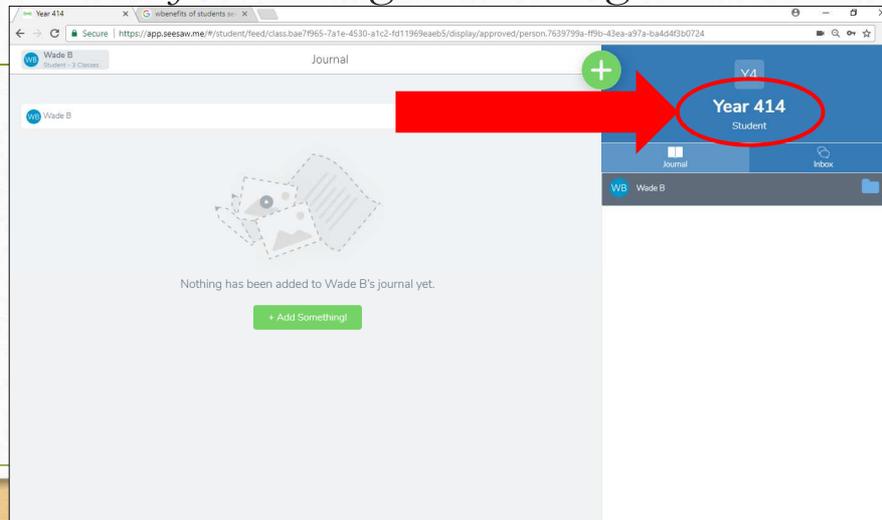

2. If not, click on your name in the top, left corner.

3. You will see the classes that you belong to.  
Click on the class you need.

4. Check that you have the correct class open  
*before* adding or creating items.

Unfortunately, we cannot move items  
into another class.

If you post an item into the wrong class,  
we will have to **delete it** and you will have to  
**post it again** into the correct class.
